

# The effects of the pollution on the sea

# The pollution of the turtle

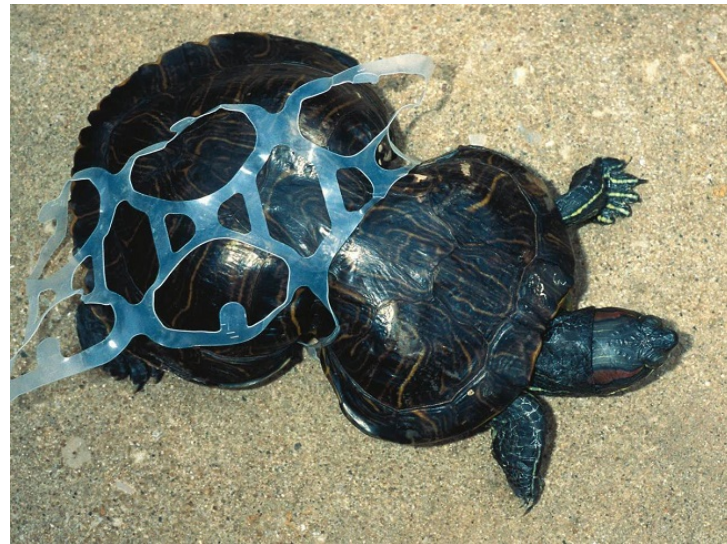

## Cause :

- The turtles are endangering species because the human are throwing the plastic in the sea, which take time to decompose.

## Consequences :

- The turtles eat the plastic. They die because they suffocate with the plastic.
- The shell of the turtles deform because the plastic surrounds them.

## Solutions of reduce the negative effects are :

- To put more bin on the beach.
- To reduce the production of the plastic.

# The pelicans are affected by fuel oil

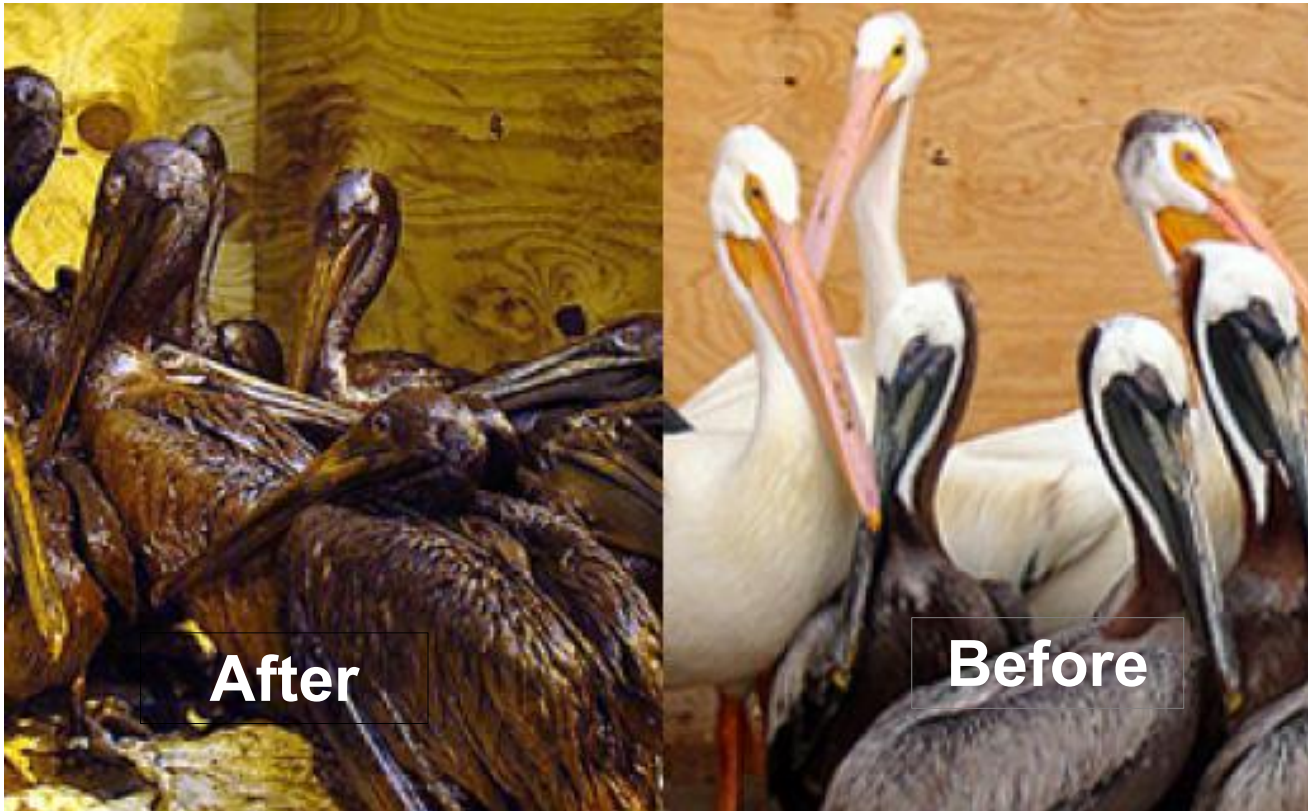

## Causes :

- When the boats are failing, the fuel oil is spreading in the sea.

## Consequence :

- When the pelicans hunt the fishes, they drink some fuel oil. After the pelicans are oily.

## Solutions :

- To reduce the production of fuel oil.
- Change the mode of transport of fuel oil.

# The end !
